Subject: CTV II and III

Travis,

We would like to let you know that EPA has determined that all of the information pertaining to the CTV II and CTV III Class VI Underground Injection Control permit applications Carbon TerraVault Holdings LLC submitted to EPA's Geologic Sequestration Data Tool (GSDT) system is responsive and releasable to a Freedom of Information Act request EPA received.

We would also like to confirm that EPA had previously shared with the California Geologic Energy Management Division and the State Water Resources Control Board the project name information available in the GSDT for CTV II and CTV III.

Please let us know if you have any questions.

Regards,
Calvin
